Security Phrase

Please create a unique phrase that only you are familiar with. This phrase will be displayed to you whenever you log into the Online Banking system. The purpose of this phrase is to assure you that you are logging into your financial institution's secure Online Banking site instead of a fraudulent site.

Always remember that if you do not see your unique phrase when logging into the Online Banking system do not key in your passcode and call your financial institution immediately!

Security Questions

Please configure five different questions below. These questions will be used to perform additional authentication when logging into Online Banking. You can select pre-defined questions from the drop down menus, create your own unique questions by typing them in the space below the drop down menu, or use a combination of either pre-defined or custom questions. For each question, please type an answer in the field below the question.

To provide maximum protection for your online accounts from unauthorized use, it is best to choose questions that only you or other authorized users will know the answers to. Your answers will not be case-sensitive.

Security Code Delivery Methods

For your protection we have added an additional layer of security. When logging into Online Banking, you may be asked to enter a security code. This code can be sent to you via text message or through an automated phone call.

Please provide a valid phone number that can receive such messages and specify whether the message should be delivered via text or voice. You will be able to add more delivery methods once you have logged into Online Banking.

 **Security Code Delivery Method**
Please configure the initial delivery method below.

Type	<input type="text" value="Please select a type"/> Text Message / SMS Voice Phone Call	<small>◀ The type of message (text/SMS or voice)</small>
Phone Number	<input type="text" value="555-555-0100"/>	
Test Message	<input type="radio"/> Yes - Send a test message <input checked="" type="radio"/> No - Do not send a test message
